

PCN10 Series

IEC603-2 / DIN41612 Standard Compliant Products

DIN Standard

P=2.54 mm

Wide Variation

Features

1. Complies with DIN Standard

Complies with IEC603-2/DIN41612 standard.

2. Number of Positions

14 pin variations available : 16, 20, 24, 30, 32, 44, 48, 50, 64, 90, 96, 100, 128, and 144

3. Two-point Contact Design

Highly reliable double-sided two point contacts.

Double-sided Two-point Contact System

Two-point Contact Design

4. Wide Applications

DIN standard types of B, C, R, and Q are available.
The easy lock pin type for temporary board installation is available.

5. Stacking Height Variation

The PCN10H Series includes 5 stacking height variations : 25, 30, 35, 40 and 45mm.

Stacking Connector

6. Circuit Protection

The PCN10MC Series has a sequence design for circuit protection.

7. Cable Connector

IDC connectors for ribbon cable are available.
Crimp connectors compatible with 26-30 AWG are also available.

Applications

Computers, Control Equipment, Switches, Measuring Devices, etc.

Product Specifications

Rated Current	2A	Operating Temperature (Note 1)	-55 to +85°C
Rated Voltage	300V AC	Operating Humidity Range	85% Max.
		Storage Temperature (Note 2)	-10 to +60°C
		Storage Humidity Range (Note 2)	40 to 70%

Item	Specification	Condition
Insulation Resistance	10 ⁶ M Ω Min.	Measured at 100V DC
Withstanding Voltage	No flashover or insulation breakdown.	1000V AC for 1 min. (IDC, Crimp Type : 650V AC)
Contact Resistance	20m Ω Max.	Measured at 0.1A
Vibration Resistance	No electrical discontinuity of 10 μ s Min.	Frequency : 10 to 55 Hz, single amplitude of 0.75 mm, 2 hours in each of the 3 directions.
Humidity (Steady State)	Insulation resistance : 10 ⁶ M Ω Min.	96 hours at temperature of 40 ± 2°C and humidity of 90% to 95%
Temperature Cycle	No damage, cracks, or parts looseness.	(-65°C : 30 minutes → 15 to 35°C : 5 minutes Max. → 125°C : 30 minutes → 15 to 35°C : 5 minutes Max.) 5 times
Mating Durability	Contact resistance : 20m Ω Max.	500 times
Soldering Heat Resistance	No deformation of components affecting performance.	Manual soldering : 350°C for 3 seconds

Note 1 : Includes the temperature rise due to current flow.

Note 2 : The term "storage" refers to products stored for long period of time prior to mounting and use. The operating temperature and humidity range applies to the non-energized state after board mounting and temporary storage during transportation.

Material / Finish

Component		Material	Color/Finish	Remarks
Insulator		PBT	Gray	UL94V-0
Contact	Pin Header	Brass	Contact Area: Nickel Underplated+Gold Plated Remaining Areas: Nickel Underplated+Tin Plated	-
	Receptacle	Copper Alloy		

Product Number Structure

■ PCN10 Series

Refer to the chart below when determining the product specifications from the product number.
Please select from the product numbers listed in this catalog when placing orders.

■Circuit Protection Type

Contact Numbers

For the mating of DIN Standard type C (Type B) and Type R (Type Q), the contact numbers are No.1-32 and the rows are a, b, and c.

- DIN standard type C and type R represent the 3-row 96 contacts type, including 32 contacts in single-row.
- DIN standard type B and type Q represent the 2-row 64 contacts type, including 32 contacts in single-row.

1. Receptacle Straight Type

Type C (Type B)

Contact No.
Inverted

2. Pin Header Right Angle Type

Type C (Type B)

Contact No.
Inverted

3. Pin Header Straight Type

Type R (Type Q)

4. Receptacle Right Angle Type

Type R (Type Q)

Note : DIN connectors are standardized based on a combination of straight and right angle types. In the above figure, the contact no. of combination 1-2, 3-4 match, but the contact no. of combination 1-3, 2-4 are inverted.

Pin Header : 2-row Right Angle Type (DIN Standard Type B)

Polarity Key

Use of the polarity key prevents connector misinsertion.

Insert the polarity key into both the receptacle side and pin header side.

Insert the polarity key far enough so that it makes contact with the bottom of the mold.

●Contact Extraction Tool

Part No.	HRS.No.
PCN10-PO	CL0550-0282-1-00

Circuit Protection Type

●Features

- 1. When mated, first the power supply (ground) is contacted followed by signal. When removed, the signal is disconnected followed by power supply (ground). This prevents the circuit from being affected if the board is removed or inserted when the power is on.
- 2. The exterior is black to distinguish it from the other PCN10 Series. (PCN10MC cannot be mated with other series.)

Technical drawing of a rectangular metal plate. The drawing shows a top view of the plate with various dimensions and tolerances. The overall width is 3.6 ± 0.1 . The overall height is 2.54 ± 0.1 . The distance from the top edge to the first row of holes is 2.54 ± 0.1 . The distance between the centers of the first two rows of holes is 2.54 ± 0.1 . The distance between the centers of the first and last rows of holes is $D \pm 0.1$. The distance between the centers of the first and last columns of holes is $C \pm 0.1$. The diameter of the first row of holes is $\phi 0.8^{+0.1}_{-0}$. The diameter of the last row of holes is $\phi 2.8^{+0}_{-0}$. The drawing also shows a cross-section of the plate with a thickness of 0.1 .

Note: Please note that the above series cannot mate with PCN10EA Series

Precautions

●DIN Connector Mating Conditions

Use Hirose DIN connectors within the following range.

The contacts of the PCN10 Series receptacle rattle slightly in order to stabilize the contact installation but this does not represent a performance issue.

While Taking in Consideration

Specifications mentioned in this catalog are reference values.

When considering to order or use this product, please confirm the Drawing and Product Specifications sheets.

Use an appropriate cable when using the connector in combination with cables.

If considering usage of a non-specified cable, please contact your sales representative.

If assembly process is done by jigs & tools which are not identified by Hirose, assurance will not be given.

If considering usage for below mentioned applications, please contact your sales representative.

In cases where the application will demand a high level of reliability, such as automotive, medical instruments, public infrastructure, aerospace/ defense etc. Hirose must review before assurance of reliability can be given.

PCN12 Series

IEC603-2 / DIN41612 Standard Compliant Products

DIN Standard

P=2.54 mm

Wide Variation

Features

1. Complies with DIN Standard

Complies with IEC603-2/DIN41612 standard.

2. Number of Positions

12 pin variations available : 10, 16, 20, 24, 28, 32, 44, 50, 64, 90, 96 and 100.

3. Two-point Contact Design

Highly reliable double-sided two point contacts.

Double-sided Two-point Contact System

Two-point Contact Design

4. Wide applications

DIN standard types of C is available.
The easy lock pin type for temporary board installation is available.

Applications

Computers, Control Equipment, Switches, Measuring Devices, etc.

Product Specifications

Rated Current	2A	Operating Temperature (Note 1)	-55 to +85°C
Rated Voltage	300V AC	Operating Humidity Range	85% Max.
		Storage Temperature Range (Note 2)	-10 to +60°C
		Storage Humidity Range (Note 2)	40 to 70%

Item	Specification	Condition
Insulation Resistance	10 ⁶ MΩ Min.	Measured at 100V DC
Withstanding Voltage	No flashover or insulation breakdown.	1000V AC for 1 min. (IDC, Crimp Type : 650V AC)
Contact Resistance	20mΩ Max.	Measured at 0.1A
Vibration	No electrical discontinuity of 10 μs Min.	Frequency : 10 to 55 Hz, single amplitude of 0.75 mm, 2 hours in each of the 3 directions.
Humidity(Steady State)	Insulation resistance : 10 ⁶ MΩ Min.	96 hours at temperature of 40 ± 2°C and humidity of 90% to 95%
Temperature Cycle	No damage, cracks, or parts looseness.	(-65°C : 30 minutes → 15 to 35°C : 5 minutes Max. → 125°C : 30 minutes → 15 to 35°C : 5 minutes Max.) 5 times
Mating Durability	Contact resistance : 20mΩ Max.	500 times
Soldering Heat Resistance	No deformation of components affecting performance.	Manual soldering : 350°C for 3 seconds

Note 1 : Includes temperature rise due to current flow.

Note 2 : The term "storage" refers to products stored for long period of time prior to mounting and use. The operating temperature and humidity range applies to the non-energized state after board mounting and temporary storage during transportation.

Precautions

●DIN Connector Mating Conditions

Use Hirose DIN connectors within the following range.

The contacts of the PCN10 Series receptacle rattle slightly in order to stabilize the contact installation but this does not represent a performance issue.

While Taking in Consideration

Specifications mentioned in this catalog are reference values.

When considering to order or use this product, please confirm the Drawing and Product Specifications sheets.

Use an appropriate cable when using the connector in combination with cables.

If considering usage of a non-specified cable, please contact your sales representative.

If assembly process is done by jigs & tools which are not identified by Hirose, assurance will not be given.

If considering usage for below mentioned applications, please contact your sales representative.

In cases where the application will demand a high level of reliability, such as automotive, medical instruments, public infrastructure, aerospace/ defense etc. Hirose must review before assurance of reliability can be given.

PCN13 Series

IEC603-2 / DIN41612 Standard Compliant Products

DIN Standard

P=2.54 mm

Wide Variation

Features

1. Complies with DIN Standard

Complies with IEC603-2/DIN41612 standard.

2. Number of Positions

12 pin variations available : 10, 16, 20, 30, 32, 44, 48, 50, 64, 90, 96 and 100.

3. Two-point Contact Design

High cost performance with the single-sided two point contact design.

Single-sided Two-point Contact System

Two-point Contact Design

4. Wide applications

The easy lock pin type for temporary board installation is available.

Applications

Computers, Control Equipment, Switches, Measuring Devices, etc.

Product Specifications

Rated Current	2A	Operating Temperature (Note 1)	-55 to +85°C
Rated Voltage	300V AC	Operating Humidity Range	85% Max.
		Storage Temperature Range (Note 2)	-10 to +60°C
		Storage Humidity Range (Note 2)	40 to 70%

Item	Specification	Condition
Insulation Resistance	10 ⁶ MΩ Min.	Measured at 100V DC
Withstanding Voltage	No flashover or insulation breakdown.	1000V AC for 1 min. (IDC, Crimp Type : 650V AC)
Contact Resistance	20mΩ Max.	Measured at 0.1A
Vibration	No electrical discontinuity of 10 μs Min.	Frequency : 10 to 55 Hz, single amplitude of 0.75 mm, 2 hours in each of the 3 directions.
Humidity(Steady State)	Insulation resistance : 10 ⁶ MΩ Min.	96 hours at temperature of 40 ± 2°C and humidity of 90% to 95%
Temperature Cycle	No damage, cracks, or parts looseness.	(-65°C : 30 minutes → 15 to 35°C : 5 minutes Max. → 125°C : 30 minutes → 15 to 35°C : 5 minutes Max.) 5 times
Mating Durability	Contact resistance : 20mΩ Max.	500 times
Soldering Heat Resistance	No deformation of components affecting performance.	Manual soldering : 350°C for 3 seconds

Note 1 : Includes temperature rise due to current flow.

Note 2 : The term "storage" refers to products stored for long period of time prior to mounting and use. The operating temperature and humidity range applies to the non-energized state after board mounting and temporary storage during transportation.

Material / Finish

A 3D rendering of a metal comb, likely a component of a mechanical system. It features a long, rectangular body with a perforated top surface and a row of sharp, pointed teeth along one edge. The comb is shown at an angle, highlighting its profile and the arrangement of the teeth.

Technical drawing of a mechanical part (Fig. 1) showing dimensions and tolerances. The part is a rectangular plate with a central hole and a smaller hole on the left. Dimensions include overall width 53 ± 0.1 , overall height 5.08 ± 0.1 , and various internal dimensions and tolerances like 2.54 ± 0.1 , $C \pm 0.1$, and $D \pm 0.1$. Hole diameters are specified as $\phi 0.8^{+0.1}_0$ and $\phi 2.8^{+0.0}_0$.
